

# Digital Signage Robot

Fast, Focused and Flexible

The Digital Signage Robot is an automated device displaying dynamic information and advertisements on screens, enhancing communication in various environments.

Unlock non-stop productivity with 24/7 operation. Experience efficiency, accuracy, and reduced labor expenses, revolutionising your workflow.

Ideal for:

Retail • Healthcare • Shopping  
Electronics • FMCG • Logistics • Life Science

Fast, Focused & Flexible

“Doing small scale trials with this AMR has given us a good idea of the challenges involved in adapting this technology and the needs for future development work, “We can see the potential to go even further to develop autonomous mobile robots for precision assembly tasks such as component positioning and certification. Developing it further, we could see this technology being utilised to transport an entire aircraft wing between factories on site at Broughton.”

Airbus: Amer Liaqat – Technology Manager for Assembly Innovation & Development

Robot Center’s attention to detail and regular communication is crucial in assisting RDASH to complete the process correctly. Their customer service was excellent and that formed the foundation of an excellent relationship.

NHS: Liz Copley – Health Services Occupational Therapist

Robot Center showed great ownership ... and put in place people and resources to help the project run as smoothly as possible. If any issues arose, they were quickly and pragmatically addressed and the industry knowledge it brought to the project was a critical enabler... helped us create a truly automated and secure platform that’s ... capable of supporting the response, prevention and protection activities that help to make our supply-chain operational.

Johnson & Johnson: Gareth Clegg – Engineering Lead

# Digital Signage Robot

**Engagement:** Captivates audiences with dynamic content and interactivity.

**Efficiency:** Automates content updates and reduces manual intervention.

**Versatility:** Adapts to diverse settings, from retail to events, conveying tailored messages.

**Cost Savings:** Cuts printing costs and enables real-time updates, minimizing waste.

**Information Dissemination:** Rapidly conveys announcements, directions, and alerts.

**Brand Enhancement:** Projects a modern and innovative image, boosting brand perception.

**Audience Interaction:** Enables touchscreens and sensors for user engagement.

**Data Insights:** Gathers analytics for content optimization and audience behavior analysis.

**24/7 Availability:** Operates continuously, ensuring messages reach audiences anytime.

**Space Optimisation:** Maximises utilisation of physical spaces with dynamic displays.
